Mob: +91 8055229755

Address: Pune, Maharashtra

Summary

- **Frontend Developer** with **3+ years** of experience building responsive and scalable web applications using **React.js**, **Next.js**, **JavaScript**, **TypeScript**, and **Redux**. Skilled in component-based architecture, state management, and REST API integration to deliver efficient user interfaces.
- Experienced in developing dashboards and web platforms with focus on performance optimization, reusable components, and cross-device compatibility using **Tailwind CSS** and modern frontend practices.
- Strong understanding of **Agile development**, version control with **Git** and collaborating with cross-functional teams to deliver high-quality solutions.

Technical Skills

- **Frontend Technologies:** HTML5, CSS3, JavaScript(ES6+), TypeScript
- **Frameworks & Libraries:** React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, Shadcn UI
- **API Integration:** REST APIs, Axios, Fetch API
- **Backend & Database:** Node.js, Express.js, MongoDB
- **Testing:** Jest, React Testing Library (RTL)
- **Tools & Platforms:** Git, GitHub, VS Code
- **Methodologies:** Agile-Scrum Process

Professional Experience

Codenza Technologies LLP, Pune

Software Engineer (Freelance) | Feb 2026 – April 2026

- Developed responsive all scalable frontend modules using **React.js**, **JavaScript**, **Redux**, and **Tailwind CSS** for an emergency assistance and service platform.
- Integrated **REST APIs** and built reusable frontend components to improve application performance and maintainability.
- Collaborated with backend and design teams to deliver production-ready features with optimized cross-device compatibility.

FillRacks Pvt Ltd, Pune

Software Engineer (Freelance) | June 2025 – Nov 2025

- Engineered frontend features using **Next.js** and **TypeScript** for an inventory management system.
- Structured UI layouts and design systems using **Tailwind CSS** and **Shadcn UI**.
- Ensured smooth interaction with backend systems and improved performance on different screen sizes.

NeoSOFT Pvt Ltd, Mumbai

Software Engineer | April 2025 – June 2025

- Created user interfaces using **React.js** and **ES6+ JavaScript** for web-based solutions.
- Identified and fixed UI issues to improve usability and browser compatibility.
- Coordinated with design and backend teams to implement functional requirements.

Smartwork Ideas Pvt Ltd, Pune

Software Engineer | April 2022 – April 2025

- Built responsive interfaces using **React.js, JavaScript, and Tailwind CSS** to support multiple devices.
- Consumed **REST APIs** to handle dynamic data across multiple modules.
- Structured modular components to simplify code organization and improve scalability.
- Participated in Agile processes, contributing to code reviews and version control practices.

Projects

ResQMe – Emergency Assistance Platform

React.js, JavaScript, Redux, Tailwind CSS, REST APIs

- Managed frontend screens and user flows for emergency assistance and service request operations.
- Handled API connectivity and **Redux-based state management** for dynamic application data processing.
- Maintained responsive layouts and structured UI modules for consistent experience across multiple devices.
- Coordinated feature implementation and frontend issue resolution in collaboration with backend and design teams.

FillRacks – Inventory Management System (B2B & B2C)

Next.js, TypeScript, Tailwind CSS, Shadcn UI, REST APIs

- Built inventory management application using **Next.js and TypeScript** for product and stock handling.
- Created reusable UI components with **Tailwind CSS and Shadcn UI** to ensure consistent design.
- Enabled real-time updates by connecting frontend with backend endpoints.

Roadside Assistance Insurance Dashboard (RSA)

React.js, Redux, Tailwind CSS, JavaScript, D3.js

- Developed interactive dashboard using **React.js and Redux** to manage policies, claims, and service requests.
- Implemented reusable components to simplify UI structure and enhance maintainability.
- Visualized data relationships using **D3.js** for better understanding of policy and claim data.

Health Life Insurance Platform

React.js, Redux, Tailwind CSS, JavaScript, REST APIs

- Designed responsive insurance platform using **React.js and Redux** for policy comparison and premium calculation.
- Applied **React Hooks (useState, useEffect)** for efficient state handling and data flow management.
- Fetched and displayed real-time data through **REST APIs** for dynamic plan recommendations.
- Improved application speed using **code splitting and lazy loading** techniques.

Education

BE (Electronics & Telecommunication)

Shri Sant Gajanan Maharaj College of Engineering, Shegaon.
